

Investment Objective

Menhaden Resource Efficiency Plc (the "Company") seeks to generate long-term shareholder returns, predominantly in the form of capital growth, by investing in businesses and opportunities that are demonstrably delivering or benefiting significantly, from the efficient use of energy and resources, irrespective of their size, location or stage of development. To reflect its non-benchmarked total return investment strategy, the Company uses RPI+3% as its primary long term financial performance comparator. In addition to this absolute return performance measure, the Company also uses a range of specialist, sectoral and peer group benchmarks to assess its relative performance.

Commentary

During June, the Company's net asset value ('NAV') per share was up 2.2%, the share price was down 4.6%, while the RPI+3% was up 0.9%.

Our public equities portfolio increased 2.8% over the month, contributing 2.2% to our NAV.

Shares of **Airbus** and **Safran** both performed well, contributing 0.9% and 0.5% to our NAV respectively. Airbus enjoyed a strong showing at the Paris Air Show, with new orders for more than 800 aircraft. The company's key profit driver, the A320 program, is now sold out until 2029.

Ocean Wilsons confirmed that it is undertaking a strategic review of its investment in Brazilian port operator, Wilson Sons. The shares increased 15.4% over the month. We believe that the company could unlock significant value, with the shares trading at more than a 50% discount to NAV at the month end.

With **Microsoft** shares up more than 40% year-to-date in US dollars, we opted to reduce our position by 2.0% of NAV and take some profits. We deployed the proceeds, and some cash, into **Airbus** and **Canadian National**, leaving the positions equivalent to 12.4% and 7.5% of NAV respectively.

Our US dollar denominated holdings were negatively affected by the appreciation of sterling. The impact was partly offset by the mark-to-market on our forward currency hedges, which added 0.7% to our NAV on a standalone basis. We continue to hedge approximately half of our current Euro and US dollar exposures.

Investment Policy

The Company's investment objective is pursued through constructing a conviction-driven portfolio consisting primarily of direct listed and unlisted holdings across different asset classes and geographies. The Company invests, either directly or through external funds, in a portfolio that is comprised predominantly of a combination of listed equities and private equity investments. The flexibility to invest across asset classes affords the Company two main benefits: 1) It enables construction of a portfolio based on an assessment of market cycles; and 2) It enables investment in all opportunities which benefit from the investment theme. It is expected the portfolio will comprise approximately 15 to 30 positions.

The portfolio will be predominantly focused on investments in developed markets, though if opportunities that present an attractive risk and reward profile are available in emerging markets then these may also be pursued. While many of the companies forming the portfolio are headquartered in the UK, USA or Europe, it should be noted that many of those companies are global in nature so their reporting currency may not reflect their actual geographic or currency exposures. Subject to any applicable investment restrictions contained in the Listing Rules from time to time, the Company will not make an investment if it would cause a breach of any of the following limits at the point of investment: 1) no more than 20% of the Company's gross assets may be invested, directly or indirectly through external funds, in the securities of any single entity; and, 2) no more than 20% of the Company's gross assets may be invested in a single external fund.

Risk Warnings

This document is for information purposes only and does not constitute an offer or invitation to purchase shares in the Company and has not been prepared in connection with any such offer or invitation. Before investing in the Company, or any other investment product, you should satisfy yourself as to its suitability and the risks involved, and you may wish to consult a financial adviser.

Any return you receive depends on future market performance and is uncertain. The Company does not seek any protection from future market performance so you could lose some or all of your investment. Shares of the Company are bought and sold on the London Stock Exchange. The price you pay or receive, like other listed shares, is determined by supply and demand and may be at a discount or premium to the underlying net asset value of the Company. Usually, at any given time, the price you pay for a share will be higher than the price you could sell it. For further information on the principal risks the Company is exposed to please refer to the Company's Annual Report or Investor Disclosure Document available at www.menhaden.com.

The Company currently deploys leverage using currency forwards. These are designed to partially protect/hedge the NAV from unfavourable movements in foreign exchange rates by reducing the Company's exposure to foreign currencies. The Company can borrow but does not currently.

Important Information

Menhaden Resource Efficiency Plc (the Company) is a public limited company whose shares are premium listed on the London Stock Exchange (LSE) and is registered with HMRC as an investment trust.

The Company has an indeterminate life although shareholders consider and vote on the continuation of the Company every five years (the next such vote will be held in 2025).

The Company may, but does not currently, borrow to purchase investments. Borrowing could potentially magnify any gains or losses made by the Company.
